Mathematics of Economy, Finance and
Modeling
2022-2024

Bachelor's degree

Comenius University Bratislava
Mathematics of Economy and Finance
2019-2022

PROGRAMMING SKILLS

- R 
- Python 
- SQL 
- SAS 

PROFILE

Hi, I'm Andrea, a mathematician from Bratislava. I have completed my **Master's degree in Applied Mathematics with honors**, specializing in Economic and Financial Mathematics from the Faculty of Mathematics, Physics, and Informatics at Comenius University Bratislava.

During my academic studies, I **volunteered on projects related to high school students**, sharing my experiences and knowledge with them. After finishing university, I joined the Nexteria Leadership Academy, where I participated in projects for COOP Jednota focused on **identifying and developing strategies to better target Gen Z customers**.

Professionally, I have experience as an **Internal Auditor and Data Analytics Team Lead** at Slovenská Sporiteľňa, where I specialize in **data preparation, analysis, and data-driven auditing**. In addition to standard audit work, I lead a team of four data analysts, overseeing the development of data-driven audit strategies, Power BI reporting, and analytics-driven risk assessments. I also support colleagues in developing their data knowledge by **hosting Python and SQL trainings**, both locally and across the wider Erste Group audit team.

In my free time, I enjoy playing badminton, learning to sew my own clothes, and spending time with family and friends.

WORK EXPERIENCE

Internal auditor

January 2022 - Present

IT and Strategic Risk Management Audit Department
Slovenská sporiteľňa, a.s.

- Lead a team of four data analysts in developing **data-driven audit strategies** and ensuring data accuracy, completeness, and consistency.
- Work extensively with **SQL and Python**, primarily in **Oracle, MS SQL, and Snowflake** environments, to extract, analyze, and validate data.
- Develop **interactive Power BI reports** to present insights from data use cases, supporting auditors and executive decision-making.
- Implement **data quality checks** and audit data analytics to identify anomalies, trends, and potential risks.
- Design and execute **data-driven audit plans and testing procedures**, leveraging automation and advanced analytics for enhanced efficiency.
- Ensure **compliance with regulatory and internal policies**, reinforcing governance and risk management controls.
- Communicate findings, insights, and recommendations to senior management, driving data-informed decision-making.
